Pengujian Kit iTCLab - Program ke-1

^

https://io-t.net/itclab/article/10

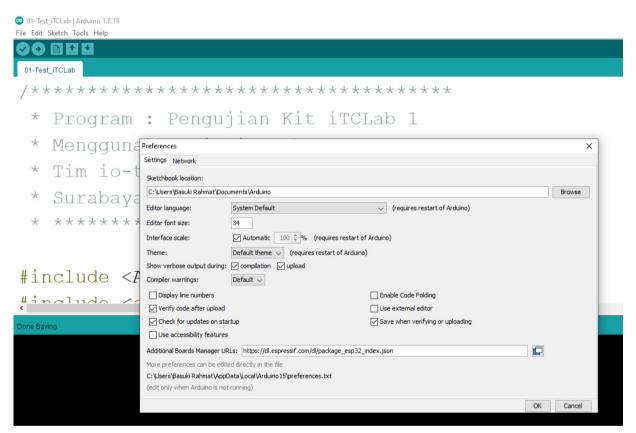

Pengaturan File - Preferences:

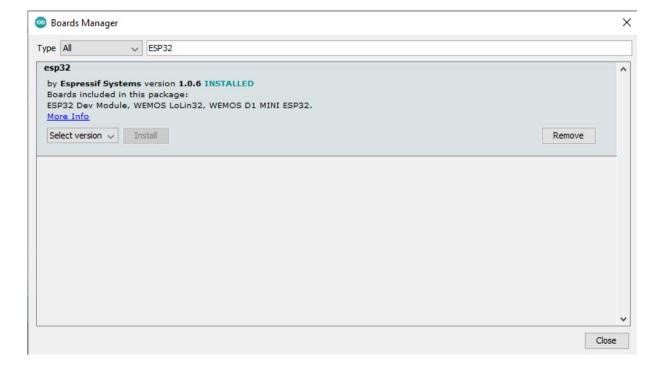

Kit iTCLab menggunakan Mikrokontroller ESP32. Silahkan di-copy dan di-paste, di Flle - Preferences, alamat berikut ini:

https://dl.espressif.com/dl/package_esp32_index.json

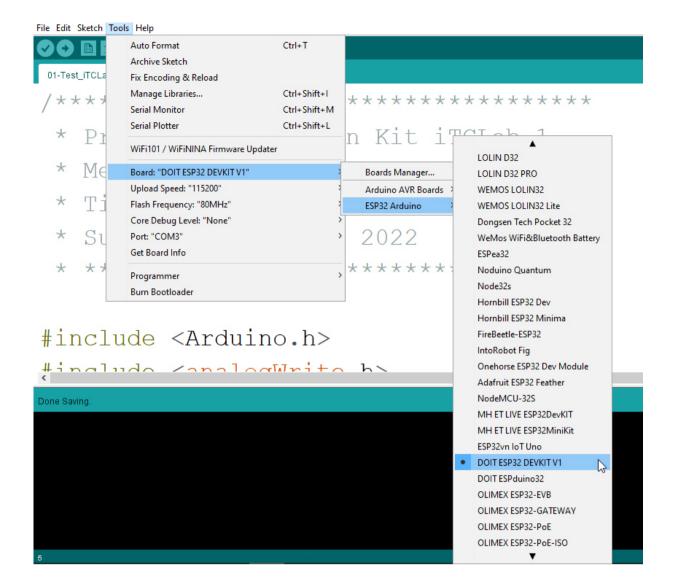

Pengaturan Board.

Kit iTCLab menggunakan Mikrokontroller ESP32. Jika belum muncul. Untuk menggunakan pertama kali , silahkan diinstall ESP32 di Board Manager.

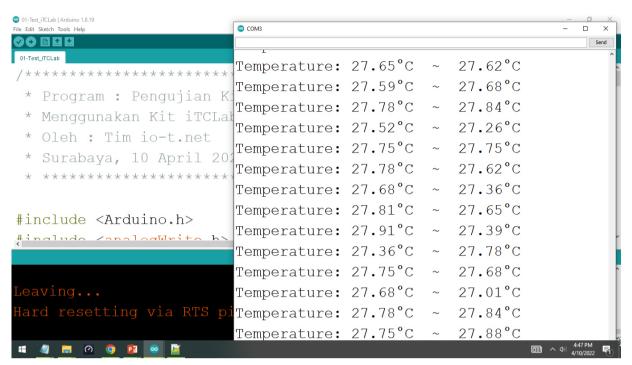

```

Download Program Pengujian Kit iTCLab (Program 1) dalam Arduino (silahkan klik-kanan Save link as), di sini: 01-Test iTCLab.ino.

Silahkan diupload ke Kit iTCLab. Silahkan cek hasilnya di serial monitor. Seharusnya hasilnya seperti gambar berikut ini.
